

ADAMA

Environmental Guidelines

KNOW | Know the potential impact on the environment and take measures to diminish it.

ADOPT | Adopt the best available and applicable technologies reducing emissions to and beyond a permissible range.

UTILIZE | Utilize energy efficiently and decrease our carbon footprint by substituting to cleaner energy sources.

HARVEST | Harvest water wisely and treat prior to flowing back to the environment.

MAINTAIN | Maintain high level of housekeeping to avoid spills into soil and groundwater.

RECYCLE | Contain liquid and solid wastes as close as possible to their source and Recycle as our design priority.

MONITOR | Monitor emissions frequently to detect deviations and respond fast if needed.

REPORT | Report any irregular findings and deviations internally and to relevant authorities.

FORECAST | Forecast upcoming changes in regulations and requirements to prepare and modify early.
